

SPARETECH

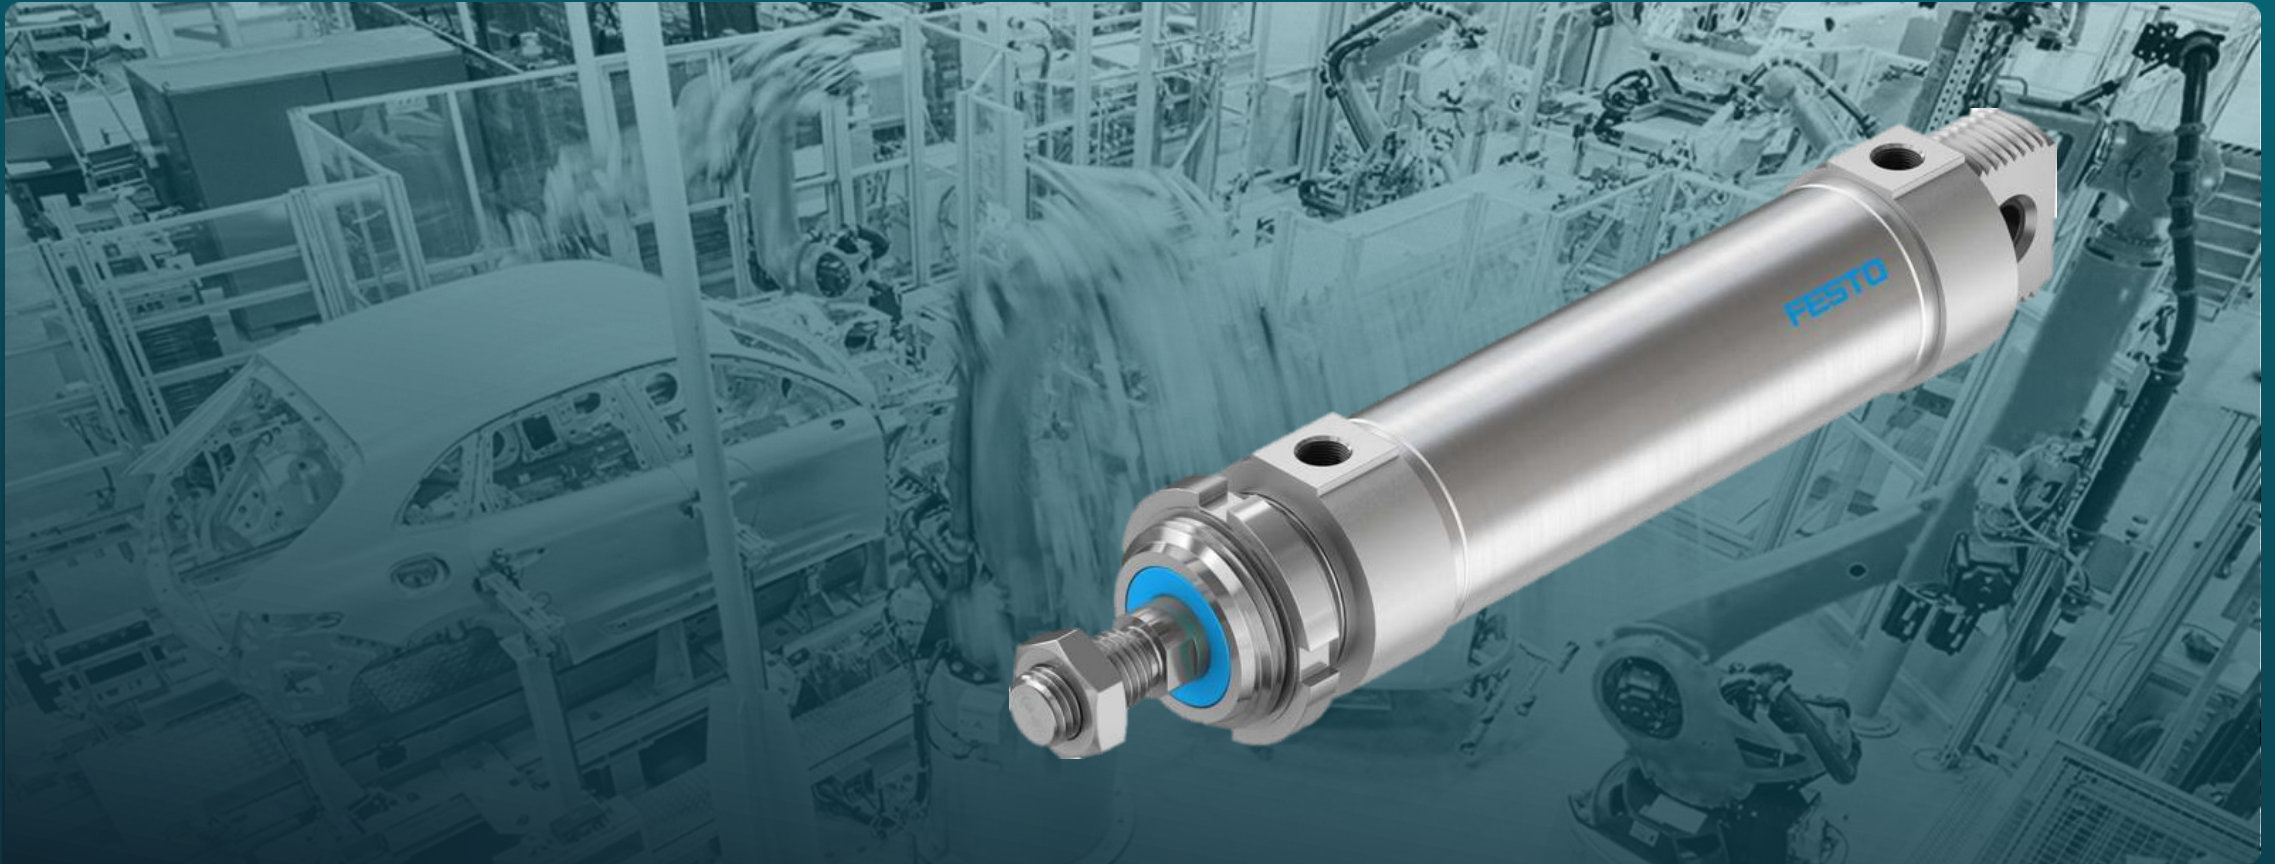

AI-powered software to cut MRO costs & unplanned downtime

From silos to connected networks

11/12/2025

Problem

> 100k€ downtime costs due to poor data

A multi-million dollar opportunity

22%

of **MRO inventories** remain unused over the past five years

10%

average YoY increase in **spare parts spend** over the past five years

12%

Average YoY change in **capital tied up in MRO inventory** over the past five years

Welcome to SPARETECH

Common industry challenges

Data

Poor master data incl. duplicates

Inconsistent processes

Missing information

Time-consuming search

Inventory

Large **manual effort**

Inventory is **overstocked**

Reactive obsolescence processes

No harmonization across sites

Sourcing

Lack of **transparency**

Unknown original manufacturer

Black box of **pricing deviations**

At a glance

SPARETECH's enterprise MRO software enables maintenance and procurement teams in manufacturing to **reliably reduce spend** and **optimize inventory** by sourcing spare parts inside or outside their production network and **stop buying parts they already have.**

Spare part management like a Bosch

“

By integrating SPARETECH as a standard process for checking spare parts lists for new machines and production lines at the Blaichach plant, **we've realized 50% efficiency gains**. This has been a game-changer for managing our high volume of new material numbers each year.

Manuel Lehmann

Group Manager Spare Parts & Maintenance Processes
Bosch Blaichach

50% Efficiency gain

Global maintenance transformation at Nestlé

Global rollout of the SPARETECH app across Nestlé operations.

Within the first 6 months, 177 plants across 4 zones successfully went live.

320 plants in total

70 countries

Brose unlocks six-figure savings in global procurement

“

SPARETECH offers an innovative reference database of spare parts for production equipment which helps Brose to optimize global purchasing data and enrich it with high-quality original manufacturer data. On the one hand, this **increases data transparency to around 98%** and, on the other, leads to **a sustainable reduction in global spare parts procurement costs** amounting to a **mid-six-figure sum**.

98% Data transparency
